

# NO MORE INTERNET HANDLES CAN BE ALLOCATED QUICKBOOKS

IT might can be happened that your firewall is being blocking your files so that's it shows that UI no more internet handles can be allocated,for fixing your things you just need to install it and set up your program. If in any case you want to do it yourself then you can also do by just following the different solution

## Fix No More Internet Handles Can Be Allocated QuickBooks

### 1. Look for firewall

>>In the first place, press the 'Start' menu and enter 'firewall'

---

### 2. Click on Advanced Settings

>>Choose 'Windows firewall' and then click 'Advanced settings'.

---

### 3. Create New Rule

>>Find and click 'Inbound Rules' and choose 'New Rule'.

---

### 4. Choose Port

>>Choose 'port' and then press 'Next'.

>>Make sure that 'TCP' is selected. You should then type the year of QuickBooks on in the following ports.

---

### 5. Allow the Connection

>>Press 'Next' and then ensure that 'Allow the Connection' is selected and press 'Next' once again.

---

### 6. Try Opening QuickBooks in The Multi-User Mode.

>>Now you can try opening QuickBooks in the multi-user mode and check if

**IT'S TIME TO TAKE ACTION!**

There are so many ways you can this procedure.
